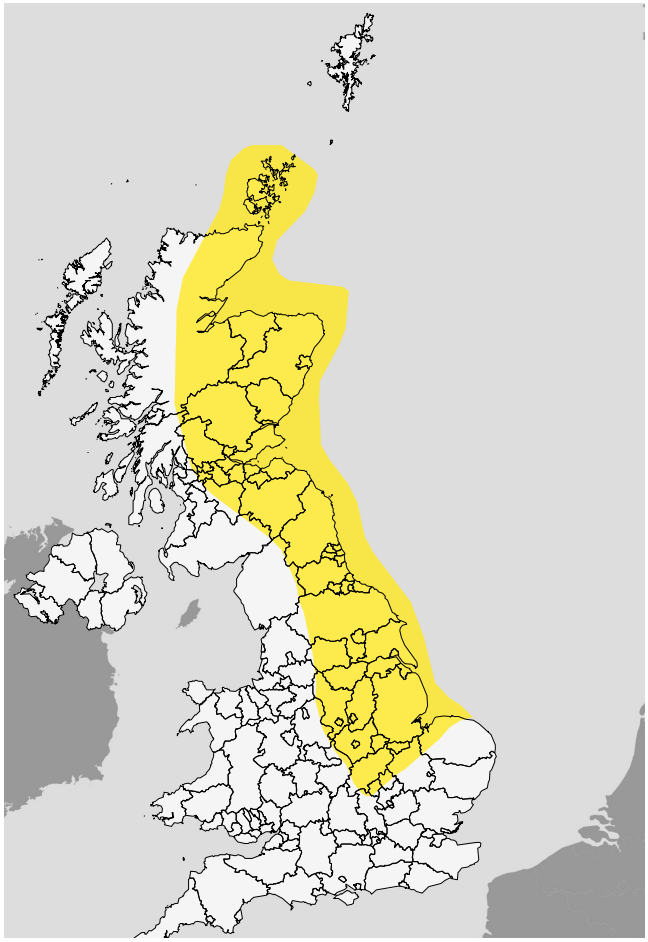
Yellow warning
Snow & Ice

Between
15:00 Sat 6 Feb 2021 and
23:59 Sun 7 Feb 2021



Snow showers will effect many northern and eastern parts of the UK, which may lead to travel disruption.

What to expect

- There is a small chance of travel delays on roads with some stranded vehicles and passengers, along with delayed or cancelled rail and air travel
- There is a small chance that power cuts will occur and other services, such as mobile phone coverage, may be affected
- There is a slight chance that some rural communities could become cut off
- A small chance that untreated pavements and cycle paths become impassable

Further details

Cold air, along with snow showers to low levels pushing inland from the North Sea, is expected to spread south during the weekend. Not all locations will see snow, with the showers likely to miss some places altogether. In addition to the showers, there is a potential that an extended period of more persistent snowfall could impact parts of the East Midlands overnight Saturday and through Sunday.

This is all likely to bring areas of accumulating snow through the period with some icy stretches developing, with many parts seeing 2-5 cm of snow, with 10-15 cm possible, especially above 200 m in northern England and Scotland.

Very low likelihood of medium impacts
